

EPIC FUSION
BRING IT ALL TOGETHER

SUCCESS STORY
STEAG & PARTNER AG

**MICROSOFT 365 MODERN
WORKPLACE FOR E-LEARNING.**

SECURE MICROSOFT 365 MODERN WORKPLACE FOR E-LEARNING.

Epic Fusion transformed Steag & Partner AG's internal IT into a secure, cloud-based modern workplace with a focus on flexibility, efficiency, and the protection of Swiss e-learning expertise. Thanks to iterative collaboration, agile methodologies, and a holistic security architecture, a customized work environment has been created that replaces all legacy siloed solutions. Today, the edoniq team benefits from a location-independent, always up-to-date, and highly secure workspace directly from the Microsoft Cloud.

ABOUT STEAG & PARTNER AG.

Steag & Partner AG develops digital training and exam solutions. With its proprietary learning platform, edoniq, customers have access to a powerful cloud solution for blended learning courses.

- ~ 30 EMPLOYEES

SUCCESS STORY

Initial Situation and Objective

Location Independence and highest Security Standards.

The successful software developers from St. Gallen have long been working in flexible and distributed teams. However, earlier technical solutions led to shortcomings that made daily work more difficult. When the time came to upgrade its own server infrastructure, Steag & Partner AG opted for a modern cloud-based approach that consolidates and integrates previously isolated solutions such as VPN, data structures, and telephony.

Project

Implementation of a holistic Cloud and Workplace Strategy.

Previously, employees communicated via channels such as Teams, email, or third-party solutions. They typically stored their data on servers. Keeping the development environment up to date was time-consuming. To create a consistent, secure, and location-independent workplace, it was necessary to define a new cloud and workplace strategy. At the same time, the internal IT infrastructure was to be completely replaced. As a logical consequence of this situation, the decision was made to implement a cloud-managed modern workplace with comprehensive security features.

Solution

A secure and customized Workplace.

In a very short time, Epic Fusion assessed the initial situation using the digital fitness check. Working closely with the edoniq team, they aligned the requirements with the strategy through iterative coordination – laying the foundation for the Modern Workplace. The closely guided, agile project methodology enabled adjustments to be reviewed and approved directly. At the same time, the project team developed the definitions for the next project phases in collaborative workshops. Through Epic Fusion's holistic 5-step plan approach, the previous telephony solution and existing server-based data were also migrated to Microsoft Teams. To meet the high security standards, a cloud security architecture was developed. Based on Microsoft Security Layers, it ensures the highest level of adaptive security – across all users and devices. All development environments are always kept up to date with the latest updates. New devices are installed directly via the cloud with just a few clicks. This saves costs and significantly increases flexibility.

«Our collaboration has not only become easier and more secure, but it's also more enjoyable.»

Urs August
Owner
Steag & Partner AG

«The transition to the Epic Workplace seamlessly brought together communication, collaboration, and state-of-the-art cloud security while providing maximum device flexibility and full cost transparency.»

Michael Hohermuth
Managing Director
Steag & Partner AG

RESULTS

FLEXIBLE MODERN WORKPLACE

Thanks to the cloud migration, employees can work securely and efficiently from anywhere. Previous isolated solutions have been replaced by one integrated, modern workplace environment.

HIGHEST SECURITY STANDARDS

The new cloud security architecture, based on Microsoft Security Layers, seamlessly protects data, devices, and users while enabling adaptive security measures.

EFFICIENT, CENTRALIZED WORK ENVIRONMENT

All development environments and communication channels (Teams, email, data storage) are now integrated, up-to-date, and easy to manage, which simplifies internal collaboration.

FAST IMPLEMENTATION AND COST SAVINGS

Thanks to agile methodologies and the digital fitness check, adjustments could be implemented immediately. New devices can be deployed in just a few clicks, saving time and resources.

«The advantage of Microsoft Teams is its simplicity and flexibility. Now we can focus more on our core business.»

Nadine Frommenwiler, After Sales Relationship Manager, Steag & Partner AG

START AN EPIC JOURNEY. GET AN EPIC WORKPLACE.

We are Epic Fusion – connecting what truly makes businesses thrive: people, organizations, and technology. We don't believe in isolated tools or quick fixes. Instead, we create integrated digital workplaces that work, provide security, and deliver measurable impact. With years of expertise in Cloud, Data, Security, Modern Workplace, and AI, we build the digital foundations that enable organizations to grow sustainably. We design resilient cloud infrastructures, deliver uncompromising security, unlock the value of data, and develop tailored business solutions that simplify, automate, and optimize processes. We implement AI where it creates real business value. At the same time, we guide people through change, ensuring that new technologies are not only introduced but truly embraced. Epic Fusion means intelligently connecting everything, putting people at the center, and applying technology with purpose.

Digital first. Humans not second. That's our Epic Journey.
